Introverted Intuition

Extraverted intuition is a perceiving (information gathering) function. NPs use extraverted intuition (or Ne for short) to see theoretical possibilities and abstract connections in the world around them. Ne focuses on the objective, external world to find relationships and patterns between people, things, and events

Introverted Intuition

Introverted Intuition is a process that is oriented toward the inner world of insights, theories, and impressions. Its role is to collect conscious and subconscious data which it then integrates to create “impressions.” This ability to synthesize information gives Ni a penetrating and insightful quality.
